EXPLANATORY NOTES

Introduction

This bulletin contains the results of a sample survey of weekly earnings and hours which was conducted in respect of the last pay-period in October 1977. Some comparative figures are also shown for October 1973 to 1976 (see Tables 14 and 15).

2. Separate estimates are provided for employees in the private and government sectors and for employees in both sectors combined. Preliminary estimates were published in *Earnings and Hours of Employees, October 1977 (Preliminary)* (6303.0) issued on 14 March 1978.

3. In general, where an establishment was closed down for part or the whole of the last pay-period in October, or operations were seriously curtailed by an industrial dispute, breakdown, fire, etc., the employer was asked to supply particulars of earnings and hours for the previous normal pay-period. A copy of the form used in the 1977 survey is shown on page 6.

Scope

4. All wage and salary earners were represented except —

members of the defence forces,
employees in agriculture,
employees in private households employing staff,
waterside workers employed on a casual basis,
persons employed by private employers (other than
hospitals) not subject to payroll tax.

All hospitals, whether subject to payroll tax or not, were represented in the survey but other exempt non-government bodies, such as religious and benevolent institutions, were excluded. At the time of the selection of the sample, payroll tax was payable by employers in the States and Territories paying \$48,000 (Queensland \$62,400) or more a year in wages and salaries.

Coverage

5. The survey covered all Australian and State Government departments and authorities and stratified random samples of local government authorities, non-government hospitals (not subject to payroll tax) and other private employers.

6. Although the sample was not designed to provide estimates of the numbers of employees represented, it has been calculated that the survey was representative of approximately 2,639,000 male and 1,403,000 female wage and salary earners, comprising 1,725,000 males and 912,000 females in private employment and 914,000 males and 492,000 females in government employment. The approximate percentages of employees by category are shown in the table below.

7. As parts of the survey were conducted from samples of employers (see paragraph 5 above) the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only samples of employers were surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. For more details on the reliability of the estimates see the Technical Note on page 27.

Industry classification

8. The industry classification used for the survey was the Australian Standard Industrial Classification (ASIC) described in *Australian Standard Industrial Classification* (Preliminary Edition) 1969, Vol. 1. The table on page 4 shows details of the ASIC industries used in the survey; the abbreviated descriptions used in the tables for some industry groupings are also shown. A comparison of the ASIC industry classification with that used in surveys prior to October 1974 is shown in *Earnings and Hours of Employees, October 1974* (6304.0).

**Approximate Percentages of Employees Represented in the Survey
(Per cent)**

ASIC Code	Sub-division	Industry	Abbreviated descriptions used
C	Manufacturing —		
	21-22 Food, beverages and tobacco		
	23,24 Textiles; clothing and footwear		
	26 Paper and paper products, printing and publishing		Paper, printing, etc.
	27 Chemical, petroleum and coal products		
	29 Basic metal products		
	31,33 Fabricated metal products; other industrial machinery and equipment and household appliances		Fabricated metal products; other machinery, etc.
	32 Transport equipment		
	25,28,34 Other (a)		
	Non-manufacturing industries —		
B	Mining		
D	Electricity, gas and water		
E	Construction		
F	46-47 Wholesale trade		
	48 Retail trade		
G,H	Transport and storage; communication		
I	Finance, insurance, real estate and business services		Finance, business services
J,K(b)	Public administration and defence (b); community services		Public administration, etc.
A,L(c)	Other industries (c) (forestry and logging, fishing and hunting, entertainment, recreation, restaurants, hotels and personal services)		Other
	Total (b)(c)		

(a) Includes wood, wood products and furniture (sub-division 25); glass, clay and other non-metallic mineral products (sub-division 28); leather, rubber and plastic products and manufacturing not elsewhere classified (sub-division 34). (b) Excludes defence forces. (c) Excludes agriculture and services to agriculture (sub-divisions 01 and 02) and private households employing staff (sub-division 94).

Comparability of results

9. Similar surveys of *private* employees only were conducted in October in a number of years prior to 1972. They were based on samples of most private employers subject to payroll tax. In 1972, the coverage of the surveys was expanded to include (i) private employees in the Northern Territory and the Australian Capital Territory, (ii) employees in non-government hospitals not subject to payroll tax and (iii) employees of Australian, State and local government authorities. Estimates by *industry* contained in this bulletin are not directly comparable with those obtained from surveys prior to 1974. (See paragraph 8.)

10. The estimates shown in this bulletin reflect differences — between States, between industries and between government and private employment — in (i) the amounts earned and the hours worked for the same occupations, (ii) the occupational structures within industries, (iii) the industry structure, (iv) the definitions

and reporting of managerial, etc. staff and non-managerial employees (see paragraph 18), (v) the level of business activity including the incidence of overtime, etc., (vi) the incidence of incentive, piece-work and profit-sharing scheme payments, and (vii) the degree of implementation of equal pay for sexes, etc. In particular when comparing estimates for private and government employees points (ii), (iii), (iv) and (vii) would seem to be most important.

11. *Employees* refers to male and female wage and salary earners who received pay for the last pay period in October 1977, but see paragraph 3, page 2.

12. *Private employees* are employees of private employers subject to payroll tax and employees of non-government hospitals not subject to payroll tax.

13. *Government employees* are civilian employees of Australian and State government departments, authorities and semi-government bodies, and of local government authorities.

14. *Adult employees* comprise all employees 21 years of age and over, and employees under 21 years of age who are paid at the adult rate for their occupation. *Junior employees* are all other employees under 21 years of age.

15. *Full-time employees* are those employees who ordinarily worked 30 hours or more a week. Included are full-time employees on short-time, full-time employees who began or ceased work during the pay-period, and full-time employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. Some employees (e.g. air crews, teachers, university lecturers), although paid for a weekly attendance of less than 30 hours, were classified as full-time if they worked the normal scheduled hours for a full week.

16. *Part-time employees* are those employees who ordinarily worked less than 30 hours a week. Employees on short-time who normally worked 30 hours or more a week were classified as full-time employees.

17. For *private employees*, *non-managerial employees* were defined to include minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. They exclude *managerial, executive, professional and higher supervisory staff* who, for private employees, were not further defined. For *government employees*, *managerial, executive, professional and higher supervisory staff* were generally defined as those employees (i) who were ineligible to receive payment for overtime, or (ii) who, although subject to payment for overtime, were in charge of a significant number of employees in a separate establishment (or establishments). The basis of allocation of employees to these two categories may have varied between individual private employers and between employers in the private and government sectors, with consequent effects on survey results. For some occupations in government employment, such as school teachers and doctors, there is no general payment for overtime. In these cases, managerial, etc. staff were determined according to the degree of supervision exercised or in relation to the pay structure of associated administrative employees.

18. *Weekly earnings* refers to gross earnings before taxation and other deductions have been made. It comprises overtime earnings (see paragraph 19) and

ordinary time earnings (see paragraph 20). Where payments are made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual or other leave taken during the specified pay period; periodical payments under incentive, piece-work, profit-sharing, etc. schemes; commissions; annual or periodical bonuses; etc., one week's proportion of such payments are included. Retrospective payments are excluded.

19. *Overtime earnings* refers to that part of gross weekly earnings (as defined above) attributable to hours paid for in excess of award, standard or agreed hours of work. Overtime earnings were not reported for managerial, etc. staff.

20. *Ordinary time earnings* refers to that part of gross weekly earnings (as defined above) attributable to award, standard or agreed hours of work. Included in relation to these hours are shift allowances, penalty rates, commissions, bonuses and incentive payments, and one week's proportion of payments for annual and other leave taken during the specified pay-period.

21. *Weekly hours paid for* refers to the hours for which payment was made. It comprises overtime hours (see paragraph 22) and ordinary time hours (see paragraph 23). For employees paid other than weekly, hours were converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the specified pay-period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Hours of work were not reported for managerial, etc. staff.

22. *Overtime hours* refers to hours in excess of award, standard or agreed hours of work.

23. *Ordinary time hours* refers to award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours of work, and that part of paid annual leave, paid sick leave and long service leave taken during the specified pay-period.

NOTE. The estimated figures of average weekly earnings contained herein are rounded to the nearest 10 cents, those of average weekly hours paid for to the first decimal place, and those of average hourly earnings to the nearest cent. Any discrepancies between totals and sums of components in tables are due to rounding.

All publications produced by the ABS are listed in *Catalogue of Publications, 1977* (1101.0) which is available free of charge from any ABS office.

SURVEY OF WEEKLY EARNINGS AND HOURS, OCTOBER 1977

Particulars are to be supplied for all employees included on the Australian Capital Territory Pay-roll Tax return of the company, firm or person named in the address box on page 3 and who received pay for the last pay-period in October 1977.

Please comment briefly on any unusual features affecting this return (e.g., low or high earnings and hours) and any major differences between this return and your return for last year (if any).

Person who should be contacted if any queries arise regarding this return—NAME **Mrs.** **Telephone Number** /
Miss **STD Code** **BLOCK LETTERS**

Nature of employer's activity..... *Signature*..... *Date*.....

TABLE 23. AVERAGE EARNINGS AND HOURS, GOVERNMENT EMPLOYMENT :
PART-TIME EMPLOYEES (a), OCTOBER 1977

	Adult males	Junior males	Adult females	Junior females
Average weekly earnings (\$)	84.10	44.60	86.40	45.00
Average weekly hours paid for	9.7	13.6	16.6	13.5
Average hourly earnings (\$)	8.71	3.29	5.20	3.33

(a) Part-time employees are those who normally work less than 30 hours a week - see definitions, page 4.

TECHNICAL NOTE

RELIABILITY OF THE ESTIMATES

As the private sector and local government sector of the survey were surveyed by means of samples (see paragraph 7, page 2), the estimates in this bulletin are subject to sampling variability, that is, variations which might occur by chance because only samples of employers were surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. However, because of the small proportion of government employees who were employed by local government authorities, and the fact that coverage was complete for all other government employees, the effect of this sampling variability on *total government* estimates can be disregarded for most practical purposes.

2. For private employees the estimates obtained from this survey may differ from figures that would have been produced had information been obtained from all private employers. One measure of the likely difference is given by the standard error of the estimates. There are about two chances in three that a sample estimate will differ by less than one standard error from the results which would be obtained from a comparable complete collection, and about nineteen chances in twenty that the difference will be less than two standard errors. The table on page 27 sets out approximate percentage standard errors for average weekly earnings for full-time male and female managerial, etc. staff and non-managerial employees in private employment in each State and Australia.

3. An example of the use of this table is as follows: the estimate of average weekly earnings for adult male full-time non-managerial employees in private employment in Australia is shown in the table on page 6 as \$202.70. The table on page 27 shows the approximate

standard error of this estimate to be 0.2 per cent (or approximately 40 cents rounded to the nearest ten cents). There are two chances in three that a complete collection would give a figure within the range of \$202.30 to \$203.10 and nineteen chances in twenty that the figure would be within the range \$201.90 to \$203.50.

4. The standard errors for the published estimates of average weekly ordinary time earnings and average weekly total earnings, are generally less than 2 per cent. The standard errors for the published figures of average weekly overtime earnings and hours, and for average weekly earnings and hours for part-time employees are generally less than 10 per cent.

5. The percentage standard errors for average weekly ordinary time hours and average weekly total hours are generally much lower than the corresponding figures shown in the table for average weekly ordinary time earnings and average weekly total earnings. In the case of average weekly overtime hours, the standard error percentages approximate those shown for average weekly overtime earnings. It is considered that the percentage errors for total (private and government) employees would generally be lower than those for private employees shown in the table.

6. The imprecision due to sampling variability which is measured by the standard error, should not be confused with inaccuracies that may occur because of imperfections in reporting by respondents. Inaccuracies of this kind are referred to as the non-sampling error, and they may occur in any enumeration, whether it be a full count or only a sample. Efforts are made to reduce the non-sampling error by careful design of questionnaires and detailed checking of completed returns.

average weekly earnings	standard error	average weekly earnings	standard error	average weekly earnings	standard error
202.70	40.40	199.40	44.40	201.10	41.10
202.70	41.00	199.40	45.00	201.00	41.00
202.70	41.80	199.40	45.80	201.80	41.80

(a) Part-time employees are those who normally work less than 30 hours a week - see definition, page 6.
